Re: Freedom of Information Act Request

Dear Sir or Madam:

I would like to request all information you have on an incident that the Coast Guard responded to in 1977 or 1978 in the Willamette River, in Portland, Oregon. It is my understanding that the Coast Guard was called to the site in response to a sheen on the river. The sheen was reportedly the result of runoff from oily surface soil that was being placed as fill on the riverbank. The site was an abandoned sawmill and the fill was being placed to level the site after removal of the sawmill buildings. The Coast Guard reportedly "warned" the property owner and the property owner ceased placement of the fill.

The street address of the upland property adjacent to where this incident occurred is in the 6500 Block of North Burlington, Leavitt, or John Streets or the 8400 or 8500 Block of North Crawford, Bradford Street, or Albany Streets in Portland, Oregon. The zip code in this area is 97203. Business or site names that might have been associated with the incident include, Brand S Corporation, Oregon Lumber, or Portland Development Commission. The site is located just south of the St. Johns Bridge, on the east bank of the Willamette River near River Mile 6.1.

Thank you for your help in this matter. Please call if you have any questions.

Sincerely,

BRIDGEWATER GROUP, INC.
